ARE YOU USING XERO AS EFFICIENTLY AS POSSIBLE?

Are you sure the data you are entering is accurate? Are you processing as efficiently as possible?

We will do a deep dive into your Xero file via a one on one online session:

- Run through a series of checks to validate your data
- Discuss processes and investigate any efficiency gains in your processing systems
- Make suggestions on how you can get more useful information out of your file
- Discuss any third party apps which are likely to improve the effectiveness of the accounts process
- Suggest any features in Xero you may not be aware of which would benefit your business
- Make any small fixes during the meeting
- Provide you with a written report of action points to complete based on what we have found.

This process will give you the **Peace of Mind** that your accounting data is accurate and therefore giving you information, enabling you to make **informed financial decisions** to push your business forward.

Call us today to book your session.
